DETAILED ACTION

This application was filed 5/12/2005 and is a 371 of PCt/GB03/04915 (11/13/2003) which claims priority to UK 0226931.4 (11/19/2002). Claim 2 was canceled by paper dated 6/30/2006. Claims 1 and 3-10 are before the Examiner.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. The rejection of claim 8 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement, as stated in paper dated 3/30/2006 is upheld.

Applicant has amended the claim to be a method of treating diabetes of obesity.

However, it remains that that the instant specification does not adequately describe the nexus between the mediation through glucokinase and a useful treatment of diabetes (type I and II as well as juvenile diabetes) and/or obesity. Mediation/modulation of a receptor involves antagonism, inhibition, agonism and others. These modulations are sometimes opposite reactions to the same receptor. Further, there is no nexus provided by the instant specification between the action at the receptor level and the treatment of a specific disease.

The rejection of claim 8 under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement, as stated in paper dated 3/30/2006, is upheld.

Applicant has argued that the claim has been changed to be a method of treating diabetes and/or obesity. However, the amendment does not mitigate the grounds of rejection stated previously. Further, factor 7) the existence of working examples, remains lacking. Specifically, the specification has discussion of binding assays to GLK and other receptors. However, this has not been shown to be an effective treatment of diabetes (type I, type II or juvenile diabetes) or obesity.

Therefore, in view of the Wands factors and In re Fisher (CCPA 1970) discussed above and in the office action of 3/30/2006, to practice the claimed invention herein, one of ordinary skill in the art would have to engage in undue experimentation to test which diseases can be treated by the compounds of the instant claims, with no assurance of success.

This rejection can be overcome by deleting the claim.

Allowable Subject Matter

3. Claims 1, 3-7 and 9-10 are allowable over the prior art of record.

Conclusion

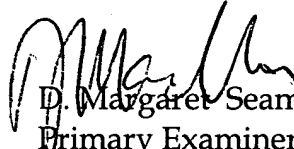

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
